ELSEVIER

Volume 51, Numbers 1–4, April 1995

Journal of Materials Processing Technology

Contents

An investigation of the residual stress of a machined workpiece considering tool flank wear 1
Z.-C. Lin, B.-Y. Lee (Taipei, Taiwan)

Tool-wear monitoring in machine turning 25
G.H. Lim (Singapore)

Statistical modelling of narrow-gap GTA welding with magnetic arc oscillation 37
C.M.D. Starling, P.V. Marques, P.J. Modenesi (Belo Horizonte, Brazil)

Determination of workability curves using two mechanical tests 50
M. Abdel-Rahman (Minia, Egypt)

The effect of material and process variables on the stamping formability of sheet materials 64
K. Park (Pohang, South Korea), Y. Kim (Taegu, South Korea)

A study of quasi-superplastic spinning of 2091 Al–Li sheet 79
K. Dachang, J. Deming, Z.R. Wang, C. Qiumuo, S. Tao (Harbin, People's Republic of China)

A residual-stress model for the milling of aluminum alloy (2014-T6) 87
K.-H. Fuh, C.-F. Wu (Taipei, Taiwan)

A hydraulic short-stroke device for deep drawing with the blank-holder force proportional to the punch force 106
S. Thiruvarudchelvan (Singapore)

Effects of ball-milling intensity on the amorphization rate of mixed $Ni_{50}Ti_{50}$ powders 122
L. Guoxian, W. Erde, W. Zhongren (Harbin, People's Republic of China)

Physical modelling of cut welding 131
P. Dorph, L.D. Chiffre (Lyngby, Denmark)

Cavitation erosion of laser-melted ductile iron 150
S.P. Gadag, M.N. Srinivasan (Karnataka, India)

Deformation analysis and die-design principles in shrink curved flanging 164
L. Chunfeng, Y. Yuying, L. Shuoben (Harbin, People's Republic of China)

Hot working characteristics of nimonic 75, 80A and 90 superalloys: a comparison using processing maps 171
N. Srinivasan, Y.V.R.K. Prasad (Bangalore, India)

The blank shape and forming limit for oval cylindrical workpieces 193
Y. Yuying, X. Hongzhi, X. Zhongwen (Harbin, People's Republic of China)

Shape-choice partition and size-determination method for the blanks for the drawing of boxes 202
Y. Yuying, X. Zhongwen, G. Gang (Harbin, People's Republic of China)

A new ceramic thread-guide composition via low-pressure injection molding 211
Ç. Toy, Y. Palaci, T. Baykara (Gebze, Turkey)

Elsevier Science S.A.

Computer-aided generation of the cutting conditions in pocket machining 223
Y.S. Tarng, Y.Y. Shyur (Taipei, Taiwan), B.Y. Lee (Yunlin, Taiwan)

Nucleation of an Al alloy in a fibre reinforced Al alloy metal-matrix composite (MMC) 235
Q.F. Li (Singapore), D.G. McCartney (Nottingham, UK)

Measurements on fibre distribution in a fibre-renforced Al metal-matrix composite (MMC) (matrix intercept-length measurements) 244
Q.F. Li, N.L. Loh (Singapore), D.G. McCartney (Nottingham, UK)

Fabrication of thick layered superconductive ceramic (Bi–Pb–Sr–Ca–Cu–O)/metal composite strips by explosive cladding and rolling 255
A.G. Mamalis, D. Pantelis, G. Pantazopoulos (Athens, Greece), A. Szalay (Budapest, Hungary)

The pure bending of sheet 274
A.B. Perduijn, S.M. Hoogenboom (Eindhoven, Netherlands)

Study of the behaviour of diamond saw-blades in stone processing 296
S.Y. Luo, Y.S. Liao (Taipei, Taiwan)

Prediction of the limiting shape and die-height in the hydraulic bulge-forming of a circular cup 309
W.B. Lee Z.R. Ma (Kowloon, Hong Kong)

Experimental and numerical analysis of the response of aluminium oxide tiles to impact loading .. 321
B. Wang, G. Lu, M.K. Lim (Singapore)

Research into the bulge forming of a tube under axial–radial compound forces and its application 346
S. Sheng, W. Tonghai (Jinan City, People's Republic of China)

Productivity, surface quality and tolerances in ultrasonic machining of ceramics 358
H. Dam, P. Quist, M.P. Schreiber (Taastrup, Denmark)

Cold forging of sintered iron-powder preforms 369
G. Sutradhar (Bihar, India), A.K. Jha (Varanasi, India), S. Kumar (Bihar, India)

Product thickness analysis in pure cup-drawing 387
S.M. Mahdavian, D. He (Melbourne, Australia)

Conference Calendar 407
